

The first and only tretinoin in a water-based lotion

From the makers of Retin-A®, Ortho Dermatologics, Altreno® (tretinoin) Lotion, 0.05% is an Rx-powered tretinoin formulation for the treatment of acne vulgaris. The Altreno formula also includes collagen, hyaluronic acid, and glycerin. In clinical trials, 4% or fewer patients reported application site reactions.^{1*}

*In 2 randomized, double-blind, vehicle-controlled trials, subjects age 9 years and older applied ALTRENO or vehicle once daily for 12 weeks

Additional benefits:

- The formula is free of fragrances, sulfates, dyes, and silicones
- Can be used day or night, once daily application
- Can be used under makeup

INDICATIONS AND USAGE

Altreno® (tretinoin) Lotion, 0.05% is indicated for the topical treatment of acne vulgaris in patients 9 years of age and older.

IMPORTANT SAFETY INFORMATION

Altreno is for topical use only. Not for ophthalmic, oral, or intravaginal use.

Skin Irritation: Patients using Altreno may experience application site dryness, pain, erythema, irritation, and exfoliation. Depending upon the severity of these adverse reactions, instruct patients to use a moisturizer, reduce the frequency of the application of Altreno, or discontinue use. Avoid application of Altreno to eczematous or sunburned skin.

Adult acne & the science of tretinoin

According to the American Academy of Dermatology, acne affects up to 50 million Americans each year, and the majority of adult patients seeking dermatological consultations for the treatment of acne are women. This can be especially problematic for women, because nearly four times as many women suffer from adult acne as men.^{2,3}

Prescription topical treatments that contain retinoic acids or tretinoin are often useful for acne.⁴ Tretinoin is an efficacious treatment option that is believed to work by increasing epithelial cell turnover to help clear acne.^{5†}

[†]The exact mode of action of tretinoin in acne treatment is unknown.

(tretinoin) Lotion, 0.05%

IMPORTANT SAFETY INFORMATION (cont'd)

Ultraviolet Light and Environmental Exposure:

Minimize unprotected exposure to ultraviolet light, including sunlight and sunlamps. Warn patients with frequent sun exposure and those with inherent sensitivity to sunlight to exercise caution. Use sunscreen and protective clothing over treated areas when exposure cannot be avoided.

Fish Allergies: Altreno contains soluble fish proteins.

Use with caution in patients with known sensitivity or allergy to fish. Advise patients to contact their healthcare provider if they develop pruritus or urticaria.

Adverse Reactions: The most common adverse reactions in clinical trials were application site dryness (4%), pain (3%), erythema (2%), irritation (1%) and exfoliation (1%).

Nursing Women: It is not known whether topical administration of tretinoin could result in sufficient systemic absorption to produce detectable concentrations in human milk. The developmental health benefits of breastfeeding should be considered along with the mother's clinical need for Altreno and any potential adverse effects on the breastfed child from Altreno.

To report SUSPECTED ADVERSE REACTIONS, contact Customer Service at 1-800-321-4576 or the FDA at 1-800- FDA-1088 or [fda.gov/medwatch](https://www.fda.gov/medwatch).
